Questions?

Router

Router

- ➢ Generate route in twig:
    - ○ path - generates relative url
    - ○ url - generates absolute url
- ➢ Write routes without trailing slash (example : */dashboard*)
- ➢ Always specify requirements for route params
- ➢ Use automatic object fetcher when it's possible (example: fetch user by id in url)
- ➢ Inject request object through DI if request data needed

Homework

Homework

- ➤ Read more about router
- ➤ Write functionality to show one job position. Link this page with list page.
- ➤ Automatically fill expiresAt in Job entity with +30 days date
- ➤ Show in list action only active jobs (add method in repository)
